

THE WORLD'S MOST SUSTAINABLE BED MANUFACTURER

A good night's sleep comes from environmentally sound materials, which means sustainability is at the heart of everything we do. We believe a sleep environment that is glue free, foam free and FR chemical treatment free is healthier and significantly reduces our impact on the planet.

Our efforts in sustainable manufacturing have been recognised with not one but two Queen's Awards for Enterprise in Sustainable Development. We are also proud to have gained a Carbon Neutral+ accreditation.

From growing our own natural fillings, to designing glue free spring systems to weaving FR chemical treatment free mattress fabric in-house, not only are we committed to using more sustainable materials in the production of our beds, but our mattresses are circular by design, each being 100% recyclable at end of life.

Knowing we are doing the right thing means we can all rest easy.

OUR SUSTAINABILITY ACHIEVEMENTS IN NUMBERS

EVERY HECTARE OF HEMP WE GROW ABSORBS
22 TONNES
OF CO₂
EACH YEAR

BY PRODUCING OUR OWN MATERIALS, WE SAVE
 **1,300**
TONNES OF CO₂ PER YEAR

THE 300 ACRE HARRISON SPINKS FARM IS HOME TO
 **600**
SHEEP

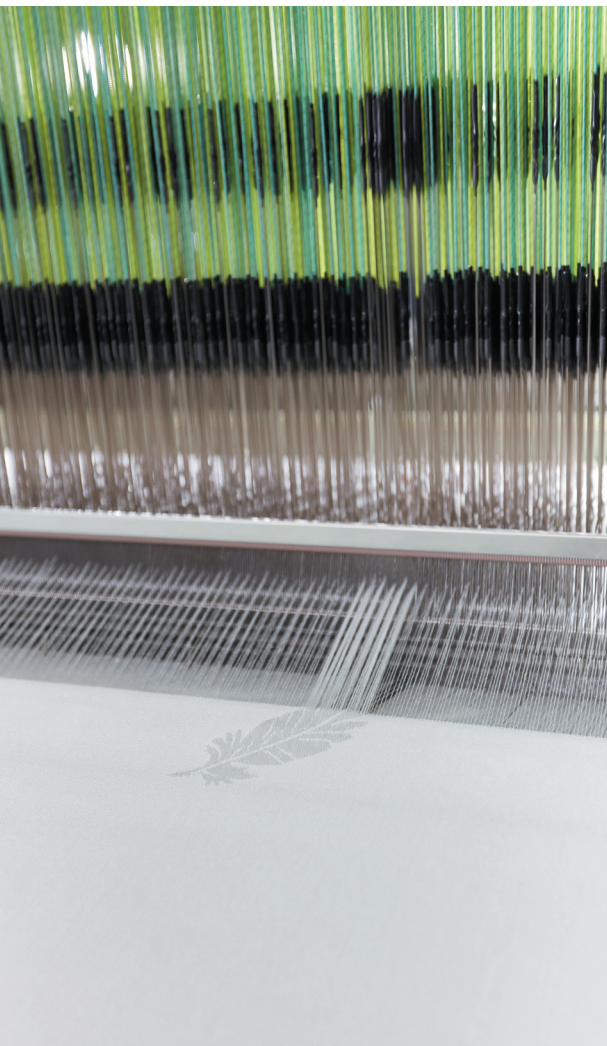

100%
RECYCLABLE SPRINGS REPLACE
FOAM = ZERO TO LANDFILL

900
TONNES
OF CO₂ SAVED
EACH YEAR
DUE TO SMALL
MACHINE
FOOTPRINTS

30% REDUCTION
IN LANDFILL
IN 2018 =
A TOTAL OF **289 TONNES**

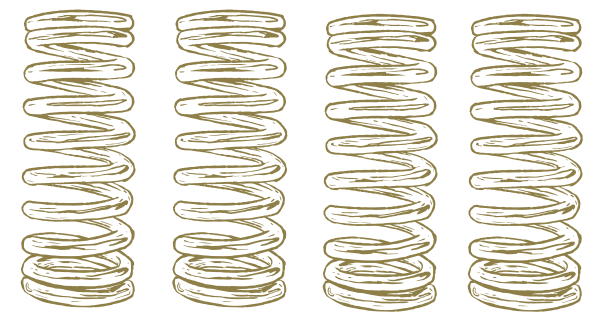

1.3 MILLION
SQM OF FR CHEMICAL
FREE TICK IS WOVEN
IN OUR FACTORY

ALL WOOD IS FSC® CERTIFIED
INCLUDING FROM OUR OWN
56-ACRE
WOODLAND
IN NORTH
YORKSHIRE

100%
OF OUR HEMP
CROP IS USED
=
ZERO WASTAGE

REMOVING THE NEED FOR
500KG
OF FR CHEMICALS A YEAR
