

HÄSTENS EALA

148.8 kilos of natural sleeping climate.

In Hawaiian, “E ala!” is a wake-up call. After your first night in a Hästens Eala, you will know the reason behind its name. You'll feel fresh and pleasantly cool. Like waking up after a mild summer night on a remote island. When our master craftsmen knead the finest horsetail hair, wool and cotton into perfectly balanced and pliable layers, they build something amazing: silent air conditioning. Moisture is transported away from your body and fresh air circulates around it. A completely natural way of creating the world's best platform for waking up to an outstanding day. Every day.

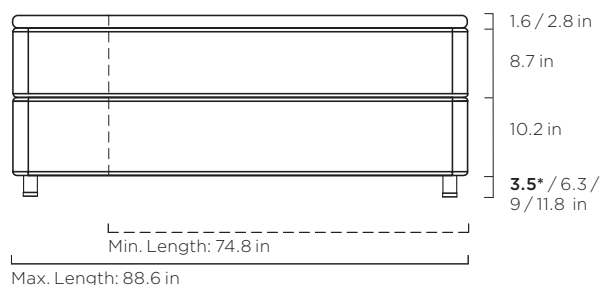

Available in standard sizes as per the table below, in addition this bed can be custom made to any length and width with a max. size of 225x225 cm (88.6 x 88.6 in). We recommend you to have the same firmnesses on each side of a bed that is 180 cm (70.866 in) wide or wider. You can choose different

firmnesses in each side, but we recommend that you have the same firmness in each side of the bed. Why? because one side will feel better than the other. Whenever you can fit to bring a full-base into your home, we recommend a full base over a split base
