

Keeping with our high product standards, Van Gogh Designs would like to present to you Eternal Foam. Encapsulating years of research and development, Eternal Foam is a high performance, high resiliency foam designed to last.

Support

Eternal foam has a high support factor, which means that the material firms up rapidly as it is compressed. This reaction increases the foams ability to provide greater long term support.

Resiliency & Longevity

The advanced airflow and tight cell structure of Eternal Foam provides higher resiliency, additional strength and less chance of the foam collapsing giving a better overall performance. All of these factors allow Eternal Foam the ability to spring back into its original shape after being compressed.

Environmentally Friendly

Eternal foam is CertiPUR-US certified and is made without:

- ▶ Ozone Depleters
- ▶ Flame Retardants
- ▶ Mercury, lead, and other heavy metals
- ▶ Formaldehyde

CertiPUR-US certified foam is also Low VOC.
(Volatile Organic Compound)

Specifications

- ▶ High Resiliency Soft Foam is 2.3lb density.
- ▶ High Resiliency Medium & Firm Foam are a 2.7lb density.
